Photographic Science and Engineering

VOLUME 6—1962; NUMBERS 1—6

TITLE INDEX

Aerial Photography, Alteration of Object Modulation by Real Atmospheres As It Affects
MILTON D. ROSENAU, JR. No. 5, p. 265
Agitation Effects
DAVE R. KAZEN AND MARTIN F. WOLNICK No. 4, p. 241
Alteration of Object Modulation by Real Atmospheres As It Affects Aerial Photography
MILTON D. ROSENAU, JR. No. 5, p. 265
Analytical Densitometry of Reflection Color Print Materials
J. E. PINNEY AND W. F. VOGLESONG No. 6, p. 367
Anamorphic Lens for Graphic Arts Uses
ARTHUR L. LATHROP No. 5, p. 303
Application of Fourier Techniques and Information Theory to the Assessment of Photographic Image Quality
R. SHAW No. 5, p. 281
Arginine, Development-Accelerating Effect of
YOSHIO MIURA AND YOSHIHIDE HAYAKAWA No. 5, p. 272
Automatic Focusing of High-Acuity Camera
J. KAPLAN No. 5, p. 254

Book Reviews
Applied Optics, Vol. 1 (1962), ed. by John N. Howard, rev. by T. H. JAMES No. 1, p. 60
Die Photographische Kamera, by Josef Stueper, rev. by KARL G. LEISTNER No. 5, p. 313
Motion-Picture Production for Industry, by Jay E. Gordon, rev. by L. W. TREGILLUS No. 3, p. 180
Proceedings of the Fifth International Congress on High-Speed Photography, ed. by J. S. Courtney-Pratt, rev. by T. H. JAMES No. 3, p. 180
Veröffentlichungen der Wissenschaftlichen Photo-Laboratorien AGFA (Wolfen), Vol. 9 (1961), rev. by T. H. JAMES No. 3, p. 180

Camera, Automatic Focusing of High-Acuity
J. KAPLAN No. 5, p. 254
Camera Design for Photography of Artificial Satellites
SOREN W. HENRIKSEN No. 6, p. 318
Coherent Optical System, Photographic Film as an Element of a
EMMETT N. LEITH No. 2, p. 75
Color Print Materials, Reflection, Analytical Densitometry of
J. E. PINNEY AND W. F. VOGLESONG No. 6, p. 367
Color Transparencies, Psychophysical Methods for Evaluating the Quality of: I. Comparison of Categorical- and Comparative-Judgment Data
W. W. WOODBURY AND C. J. BARTLESON No. 1, p. 10
II. Control of Observer Adaptation in Categorical Judgments
C. J. BARTLESON AND W. W. WOODBURY No. 1, p. 15
Colors, Preferred Reproduction of Flesh, Blue-Sky, and Green-Grass
C. J. BARTLESON AND C. P. BRAY No. 1, p. 19
Computer, Sensitometric Parameter
P. V. SENAUSKY No. 5, p. 249

Densitometer, Simple Automatic Reflection Color
J. E. PINNEY AND J. C. KINARD No. 5, p. 252
Density, Optical, and Developed Silver, Theory for, As Functions of Exposure
EUGENE F. HAUGH No. 6, p. 370
Dependence of Development Rate on the Time and Temperature of Exposure
G. C. FARNELL No. 4, p. 246
Design Considerations of Rapid Access Photographic Systems
E. R. TOWNLEY No. 1, p. 26
Detection and Recognition of Low-Contrast Images
JOHN M. STURGE No. 3, p. 156
Developing Agents, Photographic, Forming Positively Charged Semiquinones, Superadditivity with Hydroquinone of: I. The *p*-Phenylenediamines; II. The Aminophenols
J. F. WILLEMS AND G. F. VAN VEELEN No. 1, p. 39; p. 49
Development-Accelerating Effect of Arginine
YOSHIO MIURA AND YOSHIHIDE HAYAKAWA No. 5, p. 272
Development, Photographic, Mechanism of
WALTHER JAENICKE No. 4, p. 185
Development, Photographic, by Substituted Hydroquinones, Supperadditivity in
W. E. LEE AND T. H. JAMES No. 1, p. 32
Development Rate on the Time and Temperature of Exposure, Dependence of
G. C. FARNELL No. 4, p. 246
Diazotype Systems for High-Acuity Continuous-Tone Reproduction
RAYMOND ALFAYA No. 5, p. 258

Effect of the Granularity of the Negative on the Tone-Reproduction Characteristics of the Print
L. D. CLARK AND C. N. NELSON No. 2, p. 84
Effect of Level of Illuminance and Relative Surround Luminance on the Appearance of Black-and-White Photographs
EDWIN J. BRENEMAN No. 3, p. 172
Effects of Amines on the Chemical Sensitization of Silver Iodobromide
VAUGHAN C. CHAMBERS AND A. E. OBERTH No. 4, p. 216
Electrostatic Charges on Photographic Materials, New Method and Apparatus for Evaluating the Decay Rates of
R. A. FRIEND AND P. KRAUSE No. 3, p. 141
Electrostatic Images, Nature and Behavior of
R. M. SCHAFFERT No. 4, p. 197
Emulsion Techniques Since 1945, Progress in
F. W. H. MUELLER No. 3, p. 166
Experiments on the Electronic Mechanism of the Photoconductivity of Sensitizing Dyes
HANS MEIER No. 4, p. 235

Exposure Meter, Multicell, Theory of the
R. EULING No. 3, p. 121
Exposure Meter Technology, Interpretation of Current
ALLEN STIMSON No. 1, p. 1

Field Reduction of Optical Fixes
NORTON GOODWIN No. 6, p. 327
Film Cutter, High-Speed Automatic
WILLIAM C. KLEIN No. 1, p. 7
Foam Belt Transport System
JACK E. BLACKERT AND CAROL EDWARDS STERNSHER No. 2, p. 102

Generation of Look-Angles from Regularly Available Mean Orbital Elements for 1960 Iota One
J. F. OSSANNA, JR. No. 6, p. 345
Graphic Arts Films, Sensitometry of High-Contrast
G. W. SCHUMANN No. 5, p. 298
Graphic Arts Uses, Anamorphic Lens for
ARTHUR L. LATHROP No. 5, p. 303

Halftone Effect in Photographic Printing
J. H. ALTMAN AND R. M. PEDEN No. 3, p. 130
High-Speed Automatic Film Cutter
WILLIAM C. KLEIN No. 1, p. 7
High-Speed Correction of Perspective and Geometric Distortion for Meteorologic Photographs
J. A. BUCKBEE, L. C. SMITH, AND J. C. SADLER No. 6, p. 351

Illuminance and Relative Surround Luminance on the Appearance of Black-and-White Photographs, Effect of Level of
EDWIN J. BRENEMAN No. 3, p. 172
Image Quality, Photographic, Application of Fourier Techniques and Information Theory to the Assessment of
R. SHAW No. 5, p. 281
Images, Low-Contrast, Detection and Recognition of
JOHN M. STURGE No. 3, p. 156
Inexpensive Photoinstrumentation for Recording Event Times to ±0.001 Second
DONALD C. LOKERSON No. 6, p. 332
Influence of Emulsion Granularity on Quantitative Photographic Radiometry
JAMES A. EYER No. 2, p. 71
Influence of Image Motion on the Resolution of a Photographic System
DIETER P. PARIS No. 1, p. 55
Interpretation of Current Exposure Meter Technology
ALLEN STIMSON No. 1, p. 1
Iota One, 1960, Generation of Look-Angles from Regularly Available Mean Orbital Elements for
J. F. OSSANNA, JR. No. 6, p. 345

Mechanism of Photographic Development
WALTHER JAENICKE No. 4, p. 185
Meteorologic Satellite Photographs, High-Speed Correction of Perspective and Geometric Distortion for
J. A. BUCKBEE, L. C. SMITH, AND J. C. SADLER No. 6, p. 351
Method for Testing the Photographic Inertness of Construction Materials Used in Photographic Processing
PAUL J. MUTTER AND LLOYD E. WEST No. 5, p. 275
Microimages, Sensitometric Characteristics of
MARILYN LEVY No. 5, p. 307
Minitrack Astrographic Plates, Reduction of the
EMILY W. GOOD, J. H. BERBERT, AND J. D. OOSTERHOUT No. 6, p. 324

Motion of Silver Ions through Single Crystals of AgBr during Development and Solution in Complexing Agents
G. I. P. LEVENSON, W. WEST, AND V. I. SAUNDERS No. 3, p. 135

Nature and Behavior of Electrostatic Images
R. M. SCHAFFERT No. 4, p. 197
New Method and Apparatus for Evaluating the Decay Rates of Electrostatic Charges on Photographic Materials
R. A. FRIEND AND P. KRAUSE No. 3, p. 141

Optical Display of Latent Persistent Internal Polarization Images Produced with Infrared and Visible Radiation
H. P. KALLMANN, JOSEPH RENNERT, AND J. BURGOS No. 2, p. 65
Optical Fixes, Field Reduction of
NORTON GOODWIN No. 6, p. 327
Optimized H & D Curves for Reversal Films
G. W. SCHUMANN No. 3, p. 146

Perception of Small Detail in Industrial Radiographs
HILLERY S. DEBEN No. 5, p. 289
Persistent Internal Polarization Images, Latent, Produced with Infrared and Visible Radiation, Optical Display of
H. P. KALLMANN, JOSEPH RENNERT, AND J. BURGOS No. 2, p. 65
Photographic Film as an Element of a Coherent Optical System
EMMETT N. LEITH No. 2, p. 75
Photoinhibition of Vinyl Polymerization by Diazonium Salts
A. K. SCHWERIN AND F. W. MILLARD No. 4, p. 231
Photoinstrumentation, Inexpensive, for Recording Event Times to ±0.001 Second
DONALD C. LOKERSON No. 6, p. 332
Photopolymerization Induced by Metal Salts: I. Silver Salt Catalysts
S. LEVINOS AND F. W. H. MUELLER No. 4, p. 222
II. The Iron Salt–Peroxide System
F. W. H. MUELLER, H. EVANS, AND E. CERWONKA No. 4, p. 227
Polymerization, Photo, Induced by Metal Salts: I. Silver Salt Catalysts
S. LEVINOS AND F. W. H. MUELLER No. 4, p. 222
II. The Iron Salt–Peroxide System
F. W. H. MUELLER, H. EVANS, AND E. CERWONKA No. 4, p. 227
Polymerization, Vinyl, by Diazonium Salts, Photoinhibition of
A. K. SCHWERIN AND F. W. MILLARD No. 4, p. 231
Precipitation of Twinned AgBr Crystals
C. R. BERRY AND D. C. SKILLMAN No. 3, p. 159
Preferred Reproduction of Flesh, Blue-Sky, and Green-Grass Colors
C. J. BARTLESON AND C. P. BRAY No. 1, p. 19
Printing, Halftone Effect in Photographic
J. H. ALTMAN AND R. M. PEDEN No. 3, p. 130
Processing, Photographic, Method for Testing the Photographic Inertness of Construction Materials Used in
PAUL J. MUTTER AND LLOYD E. WEST No. 5, p. 275
Processing, Stabilization, with AFD-25, Acetic Acid, and Thiourea
CHRISTOPHER LUCAS AND HARVEY HODES No. 5, p. 294
Progress in Emulsion Techniques Since 1945
F. W. H. MUELLER No. 3, p 166

Psychophysical Methods for Evaluating the Quality of Color Transparencies: I. Comparison of Categorical- and Comparative-Judgment Data
W. W. WOODBURY AND C. J. BARTLESON No. 1, p. 10
II. Control of Observer Adaptation in Categorical Judgments
C. J. BARTLESON AND W. W. WOODBURY No. 1, p. 15

Radiographs, Industrial, Perception of Small Detail in
HILLERY S. DE BEN No. 5, p. 289
Radiometry, Quantitative Photographic, Influence of Emulsion Granularity on
JAMES A. EYER No. 2, p. 71
Rapid Access Photographic Systems, Design Considerations of
E. R. TOWNLEY No. 1, p. 26
Rectification of Satellite Photography by Digital Techniques
R. E. MACH AND T. L. GARDNER No. 6, p. 355
Reduction of the Minitrack Astrographic Plates
EMILY W. GOOD, J. H. BERBERT, AND J. D. OOSTERHOUT No. 6, p. 324
Reproduction, Diazotype Systems for High-Acuity Continuous-Tone
RAYMOND ALFAYA No. 5, p. 258
Resolution of a Photographic System, Influence of Image Motion on the
DIETER P. PARIS No. 1, p. 55
Reversal Films, Optimized H & D Curves for
G. W. SCHUMANN No. 3, p. 146

Satellite Photography, Rectification of, by Digital Techniques
R. E. MACH AND T. L. GARDNER No. 6, p. 355
Satellites, Artifical, Camera Design for Photography of
SOREN W. HENRIKSEN No. 6, p. 318
Satellites, Artificial, Use of Medium-Accuracy Observations for Orbit Studies of
H. F. MICHIELSEN No. 6, p. 338
Sensitization, Chemical, of Silver Iodobromide, Effects of Amines on the
VAUGHAN C. CHAMBERS AND A. E. OBERTH No. 4, p. 216
Sensitization, Spectral, by Dye Series of Regularly Increasing Chain Length, Temperature-Dependence of, and the Mechanism of Spectral Sensitization
W. WEST No. 2, p. 92
Sensitization, Spectral, Temperature-Dependence of (Note)
W. VANSELOW AND T. H. JAMES No. 2, p. 104
Sensitizing Dyes, Experiments on the Electronic Mechanism of the Photoconductivity of
HANS MEIER No. 4, p. 235
Sensitometer, Simple Step-Sector X-Ray
J. KASTNER, W. G. CIBULA, J. MACKIN, AND M. R. ROSUMNY No. 5, p. 287
Sensitometric Characteristics of Microimages
MARILYN LEVY No. 5, p. 307
Sensitometric Parameter Computer
P. V. SENAUSKY No. 5, p. 249
Sensitometry of High-Contrast Graphic Arts Films
G. W. SCHUMANN No. 5, p. 298
Silver Bromide Crystals, Precipitation of Twinned
C. R. BERRY AND D. C. SKILLMAN No. 3, p. 159
Silver Bromide during Development and Solution in Complexing Agents, Motion of Silver Ions through Single Crystals of
G. I. P. LEVENSON, W. WEST, AND V. I. SAUNDERS No. 3, p. 135
Simple Automatic Reflection Color Densitometer
J. E. PINNEY AND J. C. KINARD No. 5, p. 252
Simple Step-Sector X-Ray Sensitometer
J. KASTNER, W. G. CIBULA, J. MACKIN, AND M. R. ROSUMNY No. 5, p. 287
Stabilization Processing with AFD-25, Acetic Acid, and Thiourea
CHRISTOPHER LUCAS AND HARVEY HODES No. 5, p. 294
Superadditivity in Photographic Development by Substituted Hydroquinones Used with Phenidone
W. E. LEE AND T. H. JAMES No. 1, p. 32
Superadditivity with Hydroquinone of Photographic Developing Agents Forming Positively Charged Semiquinones: I. The *p*-Phenylenediamines; II. The Aminophenols
J. F. WILLEMS AND G. F. VAN VEELEN No. 1, p. 39; p. 49

Temperature-Dependence of Spectral Sensitization by Dye Series of Regularly Increasing Chain Length and the Mechanism of Spectral Sensitization
W. WEST No. 2, p. 92
Temperature-Dependence of Spectral Sensitization (Note)
W. VANSELOW AND T. H. JAMES No. 2, p. 104
Theory of the Multicell Exposure Meter
R. EULING No. 3, p. 121
Theory for Optical Density and Developed Silver As Functions of Exposure
EUGENE F. HAUGH No. 6, p. 370
Tone-Reproduction Characteristics of the Print, Effect of the Granularity of the Negative on the
L. D. CLARK AND C. N. NELSON No. 2, p. 84
Tungsten Flash Lamps
HAROLD E. EDGERTON AND DEAN ANDRUS No. 2, p. 81

Use of Medium-Accuracy Observations for Orbit Studies of Artificial Satellites
H. F. MICHIELSEN No. 6, p. 338
